Hi Wade, Hope I'm not too late to get some info. I believe I have the same engine as Stephen. I measured the shaft on my Tecumseh 8 HP engine, which is on my Agri-fab leaf vac chipper/shredder. The shaft is 2 9/16" long. The taper is 1 1/8" down to 7/8" over a 1 9/16" length from the block. I need to find an engine for my chipper shredder.

Working on a 5 hp Tecumseh on a Troy-Bilt chipper. It broke a rod, I rebuilt the motor, put it all back together, and started it up. All good. Ran a minute or so and then it hard stopped when the fan hit the shredder ring. It restarted and then died, would not restart. It seems to have no spark.
