The Life and Times is that Albert Einstein was both the preeminent physicist of our age and a saint. The first claim - Einstein's genius - is manifestly true. Einstein single-handedly established four of the foundational principles of modern physics (statistical mechanics, space-time equivalence, photon quantization, and ...

The life of Albert Einstein has a dramatic quality that does not rest exclusively on his theory of relativity. For the extravagant timing of history linked him with three shattering developments of the twentieth century: the rise of modern Germany, the birth of nuclear weapons, and the growth of Zionism.
