Tutorial: Getting started with Amazon EC2 Linux instances ...

I slowly started downloading some games from my library on my Linux system and I've also bought some new ones. Every single game has worked, and I honestly can't tell the difference between Windows and Linux. On Linux I'm getting 144fps at 1440p on pretty much every game (my PC is kinda high end), and if not it's the same as Windows.
